Course Description:

This course offers a broad overview of security challenges facing policymakers and citizens in the 21st century. We will begin with a “traditional” approach to security studies, examining questions surrounding the causes of war, the art of strategy, and the logic of deterrence. We will then move on to address the complex threats posed to security in the 21st century: from nuclear proliferation to environmental conflict, from terrorism to transnational organized crime, and from cyberwarfare to nonviolent resistance. By the end of the course, students are expected to demonstrate not only a deep understanding of each of these concepts, but also an ability to place contemporary challenges in their broader historical contexts and to evaluate the costs and benefits of potential policy responses.

Course Format:

We will be meeting twice a week for 75 minute sessions. While some material will be presented in lecture, we will spend much of our time openly discussing the readings and topics assigned for each day. As such, it is essential that students come to class having completed the readings and participate in discussion every class period. Throughout the semester there will also be in-class exercises and role-plays. Audio-visual materials may also be used as appropriate.

Course Materials:

All readings will be made available on Blackboard.
Evaluation:

1. Class attendance, preparation and participation: (20%)
   The time we spend in class is for me the most important of this course. As such, punctual attendance is mandatory. But more important than just being present at a desk is that you are actively engaged. I expect that you have done the readings and that you try to participate in discussion each and every class section.

2. Reading Quizzes and Writing Activities: (10%)
   Over the course of the semester, there will be 5 unannounced reading quizzes. They will consist of multiple choice questions based on the assigned reading for the day. There will also be 5 in-class writing activities which will be graded.

3. Examinations: (30%)
   There will be two exams held during class in the eighth and fourteenth weeks of the course. Each will count for 15% of your final grade. I will provide a list of possible exam questions one week before the exam. I encourage you to work with others to plan your answers in advance, but your work on exam day must be your own, produced without the assistance of books or notes.

4. Writing Assignments: (30%)
   You will complete two short (3-page single-spaced) writing assignments over the course of the semester. The first will ask you to analyze an interstate war that occurred in the past using one of the theoretical frameworks discussed in class. The second will be a policy memo to the President regarding the issue you are discussing in the final simulation. The assignments are due by the beginning of class time on Monday 2/19 and Monday 4/16. They should be uploaded electronically to Blackboard where Safe Assign will be used to scan for originality.

5. Final Simulation: (10%)
   During the scheduled exam period on Monday May 7 from 2-3:50 pm we will hold the final simulation activity, involving a meeting of the US national security council in which each student will play the role of a national security principal on one of two contemporary topics. You are expected to write a policy memo in preparation for the simulation (see above) and your participation will be graded as well.
Course Policies:

1. Successful completion of this course consistent, punctual attendance, completing the readings prior to the start of class, and active participation. If you must miss class due to a conflicting responsibility or an emergency, it is your responsibility to contact me to discuss the situation. I will generally require a short written assignment to be submitted in lieu of class attendance. Any more than 2 absences without prior notification and make-up work will affect your final grade.

2. If you think you need to delay taking an exam or submitting a written assignment, you should talk to me, generally at least two weeks before the exam/due date. Such extensions are never guaranteed, but will be based on university policy, exigency of the circumstances, and timeliness of the request (the earlier the better). Any missed exam or written assignment submitted after the deadline without prior authorization from me will not be accepted and a grade of 0 will be assigned.

3. A missed quiz is less serious in nature. If you miss a quiz, usually due to absence or tardiness, you will be given the opportunity to take a make-up 5 minutes before the next class. The questions may be different and the scoring system more difficult. Students who miss a quiz and do not show up for a make-up will receive a 0.

4. Plagiarism will not be tolerated and will lead to an F for the course. If you are unsure as to whether your approach for any given assignment may constitute plagiarism, please be sure to double check with the professor prior to handing in your assignment. Political Science department resources pertaining to plagiarism may be found at: http://www.niu.edu/polisci/audience/plagiarism.shtml

5. I am committed to your success in this class – if you feel that you are not performing to your expectations, please come and see me. I am available to answer any questions you may have about course assignments, requirements or content.

Letter Grade Distribution:

You will receive a percentage score for each assignment above that can be translated into a letter grade according to the scale below.

| >= 93.00 | A | 77.00 - 79.99 | C+ |
| 90.00 - 92.99 | A- | 70.00 - 76.99 | C |
| 87.00 - 89.99 | B+ | 60.00 - 69.99 | D |
